AEEMA MEETING - JUNE 1st, 2023		
ADAPTATION OF THE EPIDEMIOLOGICAL APPROACH TO ANIMAL DISEASES FACING GLOBAL CHANGES		
<i>Introduction to the meeting of June, 1st</i>	<i>Hendrikx Pascal</i>	11-18
<i>Global changes and consequences on animal and human infectious disease risk. Implications for veterinary sciences</i>	<i>Guégan Jean-François</i>	19-31
<i>Globalisation of food systems and human global changes - MOND'Alim 2030</i>	<i>Hugonnet Mickaël</i>	33-42
<i>Global changes and vector-borne diseases</i>	<i>Balenghien Thomas</i>	43-54
<i>Highly pathogenic avian influenza (HPAI): a changing face and the need for pragmatic adaptation</i> <i>Scoizec Axelle, Niqueux Éric, Schmitz Audrey, Grasland Béatrice, Palumbo Loïc, Huneau-Salaün Adeline and Le Bouquin Sophie</i>		55-67
<i>Expansion of tick-borne diseases, involvement of civil society in surveillance (citizen science) and development of innovative detection tools</i>	<i>Moutailler Sara, Bournez Laure et Durand Jonas</i>	69-78
<i>Landscapes modifications and emerging diseases: the case of bats</i>	<i>Moutou François</i>	79-88
<i>To include multiple stressors, new tools are used in field surveys to assess pollinator health</i> <i>Chauzat Marie-Pierre, Sanson Caroline, Druésne Christine and Laurent Marion</i>		89-96
<i>Summary of changes and adaptation needs to fight against animal diseases</i>	<i>Angot Jean-Luc</i>	97-100
AEEMA MEETING - JUNE 2, 2023		
COMMUNICATION		
<i>The intra-vector viral dynamics challenges a common assumption in vector-borne disease modelling</i>	<i>Loisel Léa, Viginier Barbara, Raquin Vincent, Ratinier Maxime, Ezanno Pauline and Beaunée Gaël</i>	101-112
POINT OF VIEW		
<i>What governance and what priorities to ensure that biodiversity-health issues are appropriately considered in public policies</i>	<i>Durand Thierry</i>	113-140
